

Flora of the Bull Run Creek and Bull Run RNA was not thoroughly collected, described or studied at the time this species list was first developed. It is based on observations of Jan Bal of the University of Idaho and collections and observations of Charles Wellner. Mike Hays (at that time Palouse Ranger District Botanist) added those species marked with (h) 5/24/1995 and used it for an INPS White Pine chapter field trip. 6/4/1995; (c1) indicates plants collected and deposited in UI Herbarium by Wellner (and/or Bal).
