

# Bumblebees are important!

**Joel Sauder**  
**Regional Wildlife Biologist, the Diversity Program**  
**Idaho Fish and Game, Lewiston**

Learn about the biology and life cycle of bumblebees. They are important in our ecosystem and gardens. Especially in early spring when the queen bees alone must get food, nectar and pollen, for herself and her first batch of worker bees. Learn about bumblebees and the key role they play in pollinating flowers and veggies and what you can do to help them.

jointly sponsored by the **Palouse Audubon Society** and the **White Pine Chapter of the Idaho Native Plant Society**.
