

# Idaho Native Plant Society White Pine Chapter Presentations

6:30 pm PDT, Wednesday April 14, 2021

Join us for TWO presentations via ZOOM: <https://uidaho.zoom.us/j/8281785557>

## Integrated Weed Management Planning for Palouse Prairie

### INTEGRATED WEED MANAGEMENT 6 STEP PROCESS

## Wisescaping with Native Plants on the Palouse

## Mattie Schmidt

Mattie Schmidt has drafted a step-by-step template for stewards of the Palouse Prairie ecosystem. Native Palouse Prairie remnants and restored areas are under constant threat of invasion by non-native plants that could displace native plants and animals. She developed this plan while working for Thorn Creek Native Seed Farm.

Mattie Schmidt recently completed her MS degree in Natural Resources at the University of Idaho. She currently works for the Natural Resource Conservation Service in Caldwell, ID.

## Leah Dreesmann

Leah Dreesmann received a mini grant from the White Pine Chapter of the Idaho Native Plant Society to research intentions, objectives, and practices of homeowners who wisescape their yard. The project looked at ecological benefits of wisescaping including the use of native Palouse Prairie plants, which are most successful, and if wisescape gardens provide habitat to native pollinators. The project is the senior thesis for Leah's undergraduate degree in Ecology and Conservation Biology at the University of Idaho. She graduates in May.

Sponsored by the Idaho Native Plant Society White Pine Chapter
